

Ultrasonic Label Slitting Machine

HSTC-U800i

For the parallel cutting of rolls to final label widths and with very fine edges HSTC-U800i incorporates the latest technologies to give the best results.

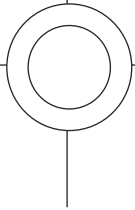

It's stand-up design makes it easy to adjust and increase production. Using touch screen as interface makes it more easy to operate.

It is installed with Switzerland's Ultrasonic (35KHz), USA's web guide for centering the labels and more accurate slitting.

Installed with ultrasonic hand gun, to connect the label from one to another roll, let the operators more easy to operate and increase the production.

All of the bearings and electric parts are from Japan and Europe
